

Medicine-Liquid

Liquid medication should be poured into the trash over absorbent materials like paper towels and napkins. The container should be rinsed and recycled.

Please do not flush medication down the toilet or sink and do not bring medication to household hazardous waste collection events.

Walgreens Pharmacies have a kiosk for safe medication disposal. To find a participating pharmacy go to: Walgreens.com Click on: "Store Locator" and filter for "Medication Disposal"

Drug Disposal Program

More than 119,000 pounds of unused prescription and over-the-counter medicines and pills have been collected in Montgomery County since the drug disposal program began in 2010. The aim of the program is to make Montco homes safer in order to prevent overdoses and accidents, while also providing a method for residents to safely dispose of these unwanted, expired medications. The program is a partnership with the Montgomery County Police Chiefs Association and the District Attorney's Office.

Accepted throughout the year at permanent MedReturn boxes are prescription and over-the-counter tablets and capsules, inhalers, creams, ointments, nasal sprays, pet medicines and vaping products.

Not accepted are needles, liquid meds and intravenous/injectable solutions.

Drop your unwanted medicines off year-round at the Royersford Police Department, 300 Main Street (Rear of building), Royersford, Pa 19468 (8am-4pm M-F).
